

CEAS Dean's Distinguished Lecture

UNIVERSITY AND FEDERAL FUNDING – UP CLOSE AND PERSONAL

Presented by

Craig S. Hartley, Ph.D., P.E.
Emeritus Program Manager, AFOSR
Former Program Manager, NSF
Former Program Manager, DOE

Seminar Coordinator: Professor Fu-pen Chiang, Department of Mechanical Engineering/CEAS (telephone 631 632 8311)

Date and Place: Wednesday, October 19, 2005, 11:00AM, Room 301, Old Engineering Building

Abstract

As a former university faculty member, university administrator and program manager in three federal agencies, Dr. Hartley offers some observations on the nature of the federal funding process as it affects university faculty. The observations are based on personal experiences, and not meant to be policy, yet provide a unique insight into the relationship between government agencies that provide research funding to universities and the faculty who perform the research. A presentation that covers the proposal solicitation and review processes, grant administration and reporting procedures will be followed by a question and answer session. The intention is to provide a realistic and useful framework within which faculty can plan and conduct research projects that merit federal support.
