MEC 422 Thermal System Design

Instructor: Dr. Juldeh Sesay  
Office: 226 Heavy Engineering  
Contact: Telephone: (631)632-8493  
Email: Juldeh.sessay@stonybrook.edu

Office Hours: Wednesdays 10 – 12 pm or by appointment

General Information’s: check blackboard

Course Description
Thermal system design. Credit 3: Device design and system design. Quantitative data for system design including operating characteristics of compressors, turbines, heat exchangers, piping systems, internal combustion engines, and other component equipment. Component matching and system simulation. Optimization including thermo-economic evaluation and energy analysis. Case studies: refrigeration and air conditioning systems; combined cycles; steam-injected gas turbines.

Course Prerequisites: Mass and Heat Transfer  
Fluid Mechanics  
Thermodynamics

Textbook

References
3. Design of Thermal Systems, Stoecker, W., McGraw-Hill  

Class schedule
Lectures: Tuesdays and Thursdays at 08:30 am – 09:50 am; Engineering 145. There will be one design project in the semester and each group should have at most four students. There is no lab project this semester.
Recitation: There is no recitation in this course. The recitation period is to be utilized for your design projects.

Teaching Assistants and Grader: to be assigned

Course Topics
1. Introduction to design and analysis and project initiation
2. Fluid properties and basic equations
3. Piping systems I
4. Piping systems II
5. Selected topics in Fluid mechanics
6. Pumps and piping systems
7. Some heat transfer fundamentals
8. Double pipe heat exchangers
9. Shell and tube heat exchangers
10. Plate and frame and cross flow heat exchangers
11. Project presentation and evaluation

**Grading and Class Policies**
Final grade is determined based on your performance on the following areas:
Homework: 12%
Design Project: 18%
Midterm 1: 30%
Midterm 2: 30%
Quizzes (5): 10%

**Course Policies:**
1. Lecture notes will not be posted on the blackboard.
2. Lectures are held on Tuesdays and Thursdays from 8:30AM to 9:50AM
3. No late homework (HW), project is accepted and zero grade will be assigned. Each homework will consist of five problems. Homework, and project must be submitted in class immediately after lectures on the due dates. All procedures must be shown in homework’s, projects, and tests.
4. The first homework page has to have heading; your name, identification number, course & HW number (MEC 422, HW-2, for example)
5. The design project report has to be typed.
6. Submitted homework for grading has to be your own work. You have to show all work or give related references. No makeup tests will be given. If you do homework with someone else, you have to understand and stand behind the submitted work on your own. If it is determined that you are not familiar with the homework you may be responsible for plagiarism and cheating, and therefore loose all credits for that homework and all other homeworks to follow.

**Special Needs/Disabilities**
If you have a physical, psychological, medical or learning disability that may impact on your ability to carry out assigned course work, I would urge that you contact the staff in the Disabled Student Services office (DSS), ECC (Educational Communications Center) Building, Room 128,(631)632- 6748. DSS will review your concerns and determine with you what
accommodations are necessary and appropriate. All information and documentation of disability is confidential.

**Statement on Academic Dishonesty**

“Academic dishonesty is an extremely serious offense and will not be tolerated in any form. Academic dishonesty in general is the presentation of intellectual work that is not originally yours. Examples include, *but are not limited to*, copying or plagiarizing class assignments including homework, reports, design, computer programs, and other submitted materials; copying or otherwise communicating answers on exams with other students; bringing unapproved aids, either in physical (written) or electronic form to an exam; obtaining copies of an exam prior to its administration, etc. Academic dishonesty violates both the ethical and moral standards of the Engineering profession and all infractions related to academic dishonesty will be prosecuted to the fullest via the CEAS CASA committee. For you, the honest student, academic dishonesty results in lower class curves, hence a depression in your GPA and class standing, while cheapening the degree you earn.”

**Calculator Policy**

“Effective Spring, 2008 only the following calculators will be permitted to be used on all midterm and final exams in the department of Mechanical Engineering. There will be no exceptions! This list of calculators is identical to that allowed for the National Council for Examiners for Engineering and Surveying (NCEES) Fundamentals of Engineering (FE) Exam that many of you will take in your senior year, as well as the professional Engineering (PE) exam that you may take several years now. The sooner you become comfortable on one of these calculators, the better.

NCEES Allowed calculators as of spring, 2008:

► Casio: All **fx-115** models. Any Casio calculator must contain fx-115 in its model name

► Hewlett Packard: The **HP 33s** and **HP 35s** models, but no others.

► Texas Instruments: All **TI-30X** and **TI-36X** models. Any Texas Instruments calculator must contain either TI-30X or TI-36X in its model name.

The NCEES policy on calculators can be found here: [http://www.ncees.org/exams/calculators/](http://www.ncees.org/exams/calculators/)”
